~ MEDIA ADVISORY ~

Springfield Transportation System Plan Website, Online Survey & Interactive Map

What: A new website to share information about Springfield's Transportation System Plan (TSP) update is now available online. The Springfield TSP will update the policies, projects, and strategies that guide transportation planning and investments within the Springfield area for the next 20 years. The website will be regularly updated with new information and opportunities to participate.

The website provides an opportunity to complete an online survey telling the project team about experience getting around Springfield and the region. Community members can also identify problem locations and ideas for improvements on a regional interactive map.

Springfield needs to update goals, policies and actions that will address the future needs and challenges of a growing population, while improving safety and mobility. Other local long-range transportation plans from the cities of Eugene and Coburg, Lane Transit District and point2point solutions will be coordinated with the Springfield TSP update. These concurrent planning processes provide a rich opportunity for collaboration and coordination through a Regional Transportation System Plan (RTSP) planning process. Project websites, surveys and interactive maps for all these projects will be coordinated through the RTSP update.

When:

1. Project Website: Available now until end of project (estimated Spring 2011)
2. Online Survey: Available now until January 31st, 2011
3. Interactive Map: Available December 14th, 2010 – January 31st, 2011

Where: Online - www.springfieldtsp.org

Cost: The website, online survey and interactive map are free and open to the public
