Sandbagging Techniques  
Traffic Control  
Personal Preparedness  
Damage Assessment  
ICS Training

For more information on any of our programs or services please give us a call: 541-682-5665

### **Community Emergency Response Team Training:**

The Community Emergency Response Team (CERT) Program educates people about disaster preparedness for hazards that may impact their area and trains them in basic disaster response skills, such as fire safety, light search and rescue, team organization, and disaster medical operations. Using the training learned in the classroom and during exercises, CERT members can assist others in their neighborhood or workplace following an event when professional responders are not immediately available to help. CERT members also are encouraged to support emergency response agencies by taking a more active role in emergency preparedness projects in their community.

### **Map Your Neighborhood:**

Map Your Neighborhood (MYN) is a program designed to help neighborhoods prepare for disasters. It is offered through your local county or city Emergency Management Office.

- Learn the first 9 Steps to Take Immediately Following a Disaster to secure your home and protect your neighborhood. It is hard to think clearly following disaster. These steps will help you to quickly and safely take actions that can minimize damage and protect lives.
- Identify the Skills and Equipment Inventory each neighbor has that are useful in an effective disaster response. Knowing which neighbors have supplies and skills ensures a timely response to a disaster and allows everyone to contribute to the response in a meaningful way.
- Create a Neighborhood Map identifying the locations of natural gas and propane tanks for quick response if needed.
- Create a Neighborhood Contact List that identifies those with specific needs such as the elderly, those with a disability, or homes where children may be alone during certain hours of the day.
- Work together as a team to evaluate your neighborhood after a disaster and take the necessary actions.

### **How is the State preparing?**

The Oregon Seismic Safety Policy Advisory Commission (OSSPAC) adopted the Oregon Resilience plan for reducing risk and improving recovery which was released to the Oregon State Legislature, February 28. The Resilience Plan and the Executive Summary are now available.
