Construction Completion: Summer 2014

## P21084 Booth Kelly Roof Repair

*Project Description: The specifics of this project will be determined by the findings of the Facility Assessment project. That study will provided information about the project scope which could range from spot repairs to a complete roof replacement or epoxy over coating of the existing metal roof decking of one or more buildings at the Booth Kelly Center. At least one building has the original 50 years old roof in place and as such no longer provides adequate weather protection.*
