**SPRINGFIELD COMMUNITY DEVELOPMENT
SURVEY NOW ONLINE**

The City of Springfield is conducting an online survey to gather public input regarding the City's residential, commercial, and industrial land needs, which will guide future growth in Springfield.

The City is required to establish an Urban Growth Boundary (UGB) separate from Eugene and determine whether Springfield has enough land in its UGB to accommodate 20 years of growth. The online survey will provide the City with information concerning the attitudes and opinions of Springfield residents regarding development issues. The City will use the survey results to create a community land-use vision and to develop strategies to implement that vision. The survey is anonymous: no individual person or business will be quoted when we report the summary results of the survey.

A link to our survey is available at: www.ci.springfield.or.us.

What: Development and Land Use survey

When: The survey will be posted online until May 27th

Where: www.ci.springfield.or.us
