

Virginia-Daisy Bikeway Project

Phase 1 of Construction Planned for 2019

The City is anticipating construction of Phase 1 of the Virginia-Daisy Bikeway Project to start in spring 2019 and continue through fall 2019. Phase 1 detailed engineering design plans are expected to be completed soon and will be put out to bid to solicit a construction contract in winter 2019.

Based on design, schedule, and funding constraints, construction of the Virginia-Daisy Bikeway Project has been broken into three phases. Phase 1 will include all elements outlined in the [Final Corridor Design Concept](#) from S. 42nd Street to Bob Straub Parkway, and the pedestrian crossing on the north side of S. 32nd Street connecting to the Bob Keefer Center for Sports. Phase 2 will include the single-lane roundabout at S. 42nd Street and Phase 3 will be from S. 32nd Street to S. 42nd Street. Staff presented the design schedule, funding, and phasing information to the City Council on November 19, 2018.

Phases 2 and 3 will be selected for construction as design is completed and funding is secured.

S. 54th Street Multi-Use Path Nearing Completion

The S. 54th Street multi-use path is nearing completion! The City completed the design work in late summer. Then the City's Operations Division built the path this past fall. Below are pictures of the path work.

Connection at S. 54th St.

Connection at S. 54th St.

Path Pavement

Additionally, lights and trees will go in along the path in winter 2019. Below are the three types of trees that will be planted.

Red Oak

Black Tupelo

Urban Sunset Maple

The City received federal transportation funds to construct a multi-use path in the undeveloped S. 54th Street right of way between the end of the existing paved surface and Daisy Street.

Share Project News with Friends and Neighbors

As the project moves closer to construction, the City of Springfield will continue to update community members through email updates and webpage updates. If you know friends and neighbors who may be interested in receiving project news forward them this e-update and they can use the link below to sign up on our list.

At key project milestones, corridor residents and property owners will also receive mail about the project. However, email updates will be sent out more frequently than paper mail.

Questions?

[Visit the Project Web Page](#)

Now that we are in the engineering design, bid, and construction phase, the project contact has been changed to one of the City's engineers.

Contact Jesse Jones, Civil Engineer, at 541.726.3720 or jjones@springfield-or.gov with project questions.
