Hello Springfield Employees!

I expect that you've heard by now that Springfield's Emergency Operations Center (EOC) was activated back on March 16 in response to the COVID-19 emergency. Some of you may be wondering what benefits an EOC provides to the City and community during a public health emergency and what we've been doing for the past 6 weeks.

The attached .pdf document contains a few slides to give you an overview of the EOC and a glimpse into a few of the things that we've been doing. It also includes a slide on when and how to request needed supplies from the EOC, and another with a couple links where you can learn more.

Thank you all for your support and encouragement! Stay safe out there!

Ken Vogeney, PE
Emergency Manager
Emergency Operations Center Manager
