

Wastewater Wise Activity

Graphic Credit: Vecteezy

Name: _____

Use this worksheet to log your water use for a full 24-hour period. Each time you perform one of the activities on the sheet, or the activity occurs in your home, place a check beside that activity. Multiply the number of check marks by the average gallons for that specific activity. Then add up your total gallons of wastewater produced over 24 hours.

✓ Activity	Average Gallons	24-hour total
	Brushed my teeth 1 gallon	1 gallon X ___ = ___
	Flushed the toilet 3 gallons	3 gallons X ___ = ___
	Washed hands 1 gallon	1 gallon X ___ = ___
	Took a bath 35 gallons	35 gallons X ___ = ___
	Took a 5-minute shower 15 gallons	15 gallons X ___ = ___
	Took a 10-minute shower 30 gallons	30 gallons X ___ = ___
	Washed dishes in the sink (water left running) 30 gallons	30 gallons X ___ = ___
	Ran the dishwasher 10 gallons	10 gallons X ___ = ___
	Ran the washing machine 30 gallons	30 gallons X ___ = ___
	Other uses Estimate gallons	___ gallons X ___ = ___
	Total gallons of wastewater produced in 24 hours	

Water Conservation Ideas

List three ways you could reduce the amount of wastewater you produce:

1. _____

2. _____

3. _____
